

PANGAEA R&D

MEETING THE FUTURE

Objectives

Among Pangaea R&D goals are the development and implementation of technological innovations and know-how, in the modern rural and urban areas, through networking, coordination and collaborative actions on multi disciplines, thus covering the fields of smart agriculture, smart cities, informatics / telematics and production technologies.

Methodology

Via our R&D activities and well established synergetic schemes, we utilize a set of methodologies and computational tools (FRAMS, CACS, PAROC) in order to efficiently support the provided services, as well as, the development of innovative products.
